

RICARDO SALINAS HUERTA

Intelligent Systems Engineer | Software Developer

San Luis Potosi, Mexico • +52 487 129 5285 • rica-sal@hotmail.com • Portfolio: <https://rica-2000.github.io/>

PROFESSIONAL PROFILE

Recent Intelligent Systems Engineering graduate with a strong technical foundation in software development and user support. Hands-on experience building high-performance web applications (Next.js) and implementing solutions with Artificial Intelligence and Natural Language Processing (NLP). Proactive, fast learner, and focused on applying technology to optimize processes and improve end-user experience.

EDUCATION

Autonomous University of San Luis Potosi (UASLP)

*B.S. in Intelligent Systems Engineering
(Degree in progress)*

San Luis Potosi, MX

Aug 2021 - Dec 2025

PROFESSIONAL EXPERIENCE

Fast Food Chain

Customer Service and Technical Support

San Luis Potosi, MX

June 2022 - August 2022

- Provided personalized customer service, ensuring high satisfaction levels in a dynamic work environment.
- Managed internal databases for inventory and sales tracking, improving operational data accuracy.
- Delivered basic IT support and troubleshooting for point-of-sale systems (hardware and software).

Graduate Engineering Program - UASLP (Social Service)

AI Chatbot Developer

San Luis Potosi, MX

Feb 2025 - Aug 2025

- Collaborated with faculty members to design and implement an AI-powered chatbot to support undergraduate students.
- Applied Natural Language Processing (NLP) concepts to improve system-user interaction and question resolution.
- Optimized communication channels between the department and students through accurate automated responses.

PROJECTS

CiComp Overflow *(Inspired by Stack Overflow)*

Next.js 15, App Router

- Developed a specialized Q&A forum for the UASLP Computer Science department.
- Designed the platform using Next.js 15 with App Router to ensure high performance and SEO optimization.
- Implemented key features such as user authentication, post creation, and a structured voting system.

STRENGTHS

Teamwork

Active collaboration in academic projects and social service, contributing in multidisciplinary teams to implement solutions.

Effective Communication

Proven ability to interact with users (customer service) and translate needs into effective technical solutions.

Adaptability

Fast learning of new technologies and frameworks, adapting quickly to dynamic requirements in development and support.
